

Enabling Cookie – Mac – Google Chrome

Step 1: Got the “Chrome” tab (or click on the wrench symbol next to the search bar) and select “Preferences”.

Step 2: A new window will appear with 3-tabs labeled *“Basics”*, *“Personal Stuff”*, and *“Under the Hood”*. Click on the *“Under the Hood”* tab.

Step 3: Once on the screen of **“Under the Hood”**, click on **“Content Settings”**. On the top of the **“Content Settings”** page, there will be a **“Cookies”** button that will say either, **“Allow local data to be set (recommended)”** or **“Block sites from setting any data”**. Click on **“Allow local data to be set (recommended)”** to enable cookies.
