

How to Enable Cookies – PC – Google Chrome

Step 1: Click on the wrench symbol next to the search bar, and select **"Options"**.

Step 2: A new window will appear with 3-tabs labeled **“Basics”**, **“Personal Stuff”**, and **“Under the Hood”**. Click on the **“Under the Hood”** tab.

Step 3: On the screen, *“Under the Hood”*, click on *“Content Settings”*. On the top of the *“Content Settings”* page, there will be a button that will say either, *“Allow local data to be set (recommended)”* or *“Block sites from setting any data”*. Please click on *“Allow local data to be set (recommended)”* to enable cookies.
